## **MB92 BARCELONA RECEIVE ISO 50001 CERTIFICATE FOR ENERGY MANAGEMENT**

MB92 Barcelona, part of the MB92 Group, today announced the recent addition of the ISO 50001 certificate for energy management by the Lloyd's Register to complement the ISO 9001 and 14001 already in place. In achieving this, MB92 Barcelona are demonstrating their ongoing commitment to improving energy efficiency and reducing their impact on the environment.

The certificate represents the culmination of months of hard work and significant investment, with the following examples of energy efficiency improvements made in the MB92 Barcelona facilities as part of the new management system:

- Cooling towers to reduce electrical consumption during the refrigeration of vessels.
- Aero thermic container to reduce gasoil consumption in paint tent heating systems.
- Smart meter systems to improve monitoring and control of electric systems.

In addition to the hardware, MB92 Barcelona have developed and implemented a number of internal operational changes that have had considerable impact:

- An enhanced procurement strategy that considers energy efficiency as a key deciding factor when forming working partnerships and selecting products.
- In house training on energy efficient working methods provided to key teams involved in operational activities in the facilities.

Natalia Varela, Lloyd's Register Service Delivery Manager for Spain, Portugal and Cuba delivered the certificate to **Miquel Àngel Lliteras, MB92 Barcelona Shipyard Manager, who stated that:** "As with all the other ISO Certificates established in MB92 Barcelona, this new certification is the result of great team work and a commitment to continually improve in the search for excellence. We have taken great strides forward in how we approach current environmental challenges and by improving the way in which we operate in the shipyard to gain greater efficiency, we will also be able to pass these benefits on to our clients."

The application of this new energy management system is to be extended to all facilities within the MB92 Group, with certification to be received soon in MB92 La Ciotat.

## **ABOUT LLOYD'S REGISTER**

About Lloyd's Register: we started out in 1760 as a marine classification society. Today, we're one of the world's leading providers of professional services for engineering and technology - improving safety and increasing the performance of critical infrastructures for clients in over 75 countries worldwide. The profits we generate fund the Lloyd's Register Foundation, a charity which supports science and engineering-related research, education and public engagement around everything we do. All of this helps us stand by the purpose that drives us every single day: Working together for a safer world.

In a world of increasing complexity - overloaded with data and opinion - we know that our clients need more than technology to succeed. They need an experienced hand. A partner to listen, cut through the noise and focus on what really matters to them and their customers. Our engineers and technical experts are dedicated to assurance. That means a commitment to embracing new technology, and a deep rooted desire to drive better performance. So we consider our customers' needs with diligence and empathy, then use our expertise and over 250 years' experience to deliver the smart solution for everyone.

After all, there are some things technology can't replace.
